

SMART CONCRETE®

CASE STUDY

Oyster Water Park Gurguram (2014)

DEVELOPER
Appu Ghar

APPLICATOR
Bajaj IFT solutions

BACKGROUND.

This much awaited, highly anticipated project, is right next to one of the busiest Metro stations in Gurgaon. This water park has two great water slides, Crazy River and Lazy River. The developer and contractor needed a solution for both. They required a solution that would work from the something from the positive side during the waterproofing stage.

SOLUTION

Because the main aim was to have the rides ready as fast as possible, the solution had to be simple and easy to apply. Our 2 step T1 and T2 slurry coating seemed to be the right answer.

The rides were waterproof and delivered as per schedule.
